A. C. HANSON.

J. JENSON.

A. C. HANSON & COMPANY,
WHOLESALE MAIL ORDER DEPARTMENT,
1012 State Street,
Racine, - - Wisconsin.

REMEMBER, we could not make such prices as we quote you from this catalogue quite so low if we were compelled to add to our price the immense expenses of mail order houses. They always approach our bargains only in appearance by sacrificing quality.

A FEW REASONS WHY WE CAN SELL GOODS AS CHEAP, IF NOT CHEAPER, THAN ANY
OTHER FIRM OR DEALER NOT CONNECTED WITH OUR SPECIAL PUR-
CHASING ORGANIZATION.

We believe you should spend your money where you will get the most for it. In furniture and kindred lines we know it is our store that your money will get the most. To also convince you of this fact we are sending this book with illustrations and prices on several articles of furniture, and invite your careful inspection of them as well as comparison to any other stock you may be able to inspect or illustrations you may have at hand to peruse.

5,000 DEALERS WHO BUY TOGETHER.

The large catalog houses of Chicago claim they are able to buy cheap owing to the fact they use such a large quantity of goods. One of these houses claims to have done in the year 1906 \$50,000,000.00 worth of business, which includes every article they handle. Our combination of 5,000 dealers buying together enables us all combined to handle triple this amount of furniture ALONE, therefore our combination is able to take complete factory outputs and by paying spot cash we secure the very lowest price obtainable.

OUR EXPENSES ARE LOW.

Aside from our advantage as explained above, our expenses are low compared with the Chicago mail order houses, as they show illustrations and tell you about their large buildings, warehouses, etc., located there, which is quite well known. Taxes in Chicago are higher than anywhere else in the country, except in New York City. One of these houses pays in taxes alone \$50,000.00 per year. In connection with this they tell you frankly they issue 1,000,000 catalogs which costs them \$1.00 each, which therefore adds \$1,000,000.00 more to their expense, which, you can see as well as we can tell you, when added to their other expenses of handling goods in a great city like Chicago, high rates of insurance they must pay, and the large number of employees they have, is something enormous. Did you ever stop to consider that all of these different items which they tell you about YOU and YOUR NEIGHBORS, as well as others in all parts of the United States, MUST PAY FOR?

THE SITUATION COMBINED IS THIS.

We buy our staple goods in such a way as to secure advantage of tremendous bulk purchases. This makes our first cost as low as any other firm on earth. Now can, and do we sell as cheap or more cheaply than they do? The next matter to be considered is the expense. Our expenses are so much less than theirs that we could afford to sell furniture at their cost, plus their expense; in other words, we would make a profit at what is actually cost to them. There is no way of getting around the fact that they and ourselves must add our respective expenses to our first cost to know our real cost, and, provided we are both buying on an equal basis, which we know we are, if not a lower basis, the firm with the lowest expense can undersell those with higher expenses, and WE KNOW WE DO.

AS TO OUR PRICES.

We invite comparison of our prices with all competitors. We know positively they are lower than others, QUALITY OF GOODS CONSIDERED, because of the reasons explained above. We can sell at low prices and still make a satisfactory profit because our expenses are so low, so slight, in fact, that when considered, the number of pieces of furniture handled by our organization of 5,000 dealers combined during the year, the expense is almost nothing on each piece. The prices throughout this book as per price list are F. O. B. cars at factory, the same as the Chicago mail houses quote for your convenience in making comparison. Any article, however, will be delivered from our store all in perfect order for a slight additional amount to cover cost of freight, unpacking, setting up, polishing, etc. In buying from the store we can save you something on freight, because we get the goods in quantities and the freight is divided on a number of items, where if a single piece is shipped the railroad companies always charge for 100 pounds, whether the article you order weighs this much or not.

A FEW WORDS AS TO QUALITY.

Quality in furniture is what makes permanent satisfaction. There is scarcely a piece in this book which could not be sold at a lower price if we were willing to sacrifice our standard of quality, but we are living in this section, doing business here, and expect to remain here. We wish to sell you furniture whenever you need it, and know if we give you value for your money you will always be our customer, as the small profit we might make on one or two pieces of furniture would not be worth speaking of. It is the continuous business of you and your neighbors that we want.

DEPARTMENT OF MATTRESSES.

moved, and makes an absolutely sanitary and comfortable bed.

WE OFFER NO MATTRESSES WITHOUT COTTON TOPS, AS SUCH MATTRESSES ARE NOT SATISFACTORY FOR USE.

OUR COTTON TOP MATTRESS is made with good layer of cotton over excelsior. Striped tick fair quality, made of good quality clean new excelsior and clean new cotton. We guarantee this mattress to be a better article than similar mattresses offered by dealers not identified with our association or by mail order houses, but recommend the purchase of one of our higher grade mattresses at a slight difference in price.

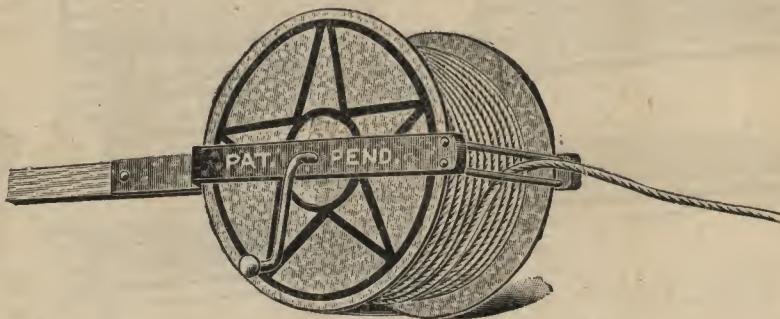

REVERSIBLE. This mattress has cotton on both top and bottom, excelsior center, fair quality striped tick, full bound and closely stitched. The cotton used is new and clean and the mattress is leather tufted and can be used either side up.

COTTON COMBINATION. This mattress is made with heavy cotton layer on both top and bottom and has cotton ends and sides. A good grade of tick is used which is well filled and strongly tufted. Has fine excelsior center and full bound edges.

FELT MATTRESS, LENOX BRAND. This mattress is made of an excellent quality of felt which we guarantee will give entire satisfaction. We use a high grade satin finished tick, full bound and tufted. Possesses the qualities found in elastic felt mattresses of this grade. To those wishing a mattress which will give them satisfaction and comfort we recommend this grade.

All of our mattresses are made full weight, which is 45 pounds. While we describe here the different mattresses we carry in stock, if you do not feel you wish to order a mattress from the above information we ask you to come to our store and make your selection. All of the above mattresses ordered from this book will be shipped to you direct from our factory No. 11, located in Chicago.

STILPS CLOTHES LINE REEL.

This great labor-saving device is a recent invention, fully patented, and is destined to become the greatest wash-day friend on the market.

No more knotty clothes lines or soiled hands from having the rope lying on the floor or ground; our clothes line reel removes all this unnecessary labor. Once filled with rope, it is there to stay for years, and it is always there when you want it. It will hold 200 feet of ordinary clothes line, is easy to operate, and is light in weight.

At the price we are placing this upon the market no woman should be without one. Try one, and have your neighbor purchase one also, you will then both appreciate the real value of this great wash-day "Marvel" and ladies' friend.

Order today; be in line; discard the old system.

Stilps clothes line reel is constructed on Number 28 galvanized iron. Center block between wheels, made of wood, 2 inches in diameter, 5 inches long. Frame work constructed of $\frac{1}{8} \times \frac{3}{4}$ galvanized band iron, rope guard constructed of $\frac{1}{8}$ -inch galvanized wire $5\frac{1}{2}$ inches long. Outside wheels are 8 inches in diameter. Handle is $3\frac{1}{2}$ inches long, made of $\frac{1}{4}$ -inch galvanized wire, provided with a sprocket $1\frac{1}{4}$ inches in diameter, which operates the reel. It is absolutely rust proof, and guaranteed in every respect.

The above chairs will weigh about 150 lbs each. They are carefully packed for shipment and are shipped from factory No. 7, Chicago.

No. 811 Rocker. The real value of this handsome leather rocker cannot be fully shown by any illustration, the frame is made of thoroughly seasoned hard wood. The seat and back is strongly supported by oil tempered high carbon bessemer steel springs of the finest quality, securely fastened and overlaid with thick layers of best quality spanish moss and high grade felt. Entire back and seat deep tufted. The fringe which extends entirely around base of chair is made of genuine leather of handsome design. Durability and comfort are combined in this luxurious leather rocker.

No. 511½. Mission Rocker. This rocker is made of solid oak thoroughly seasoned and well made in every respect. This chair has broad comfortable arms medium high back and very large roomy seat. Upholstered in spanish leather furnished to match finish desired. In offering this rocker we assure our customers they will term it the best bargain they ever received. We can furnish the chair in weathered oak, flemish oak or early english finish as desired. Carefully packed for shipment which is made direct from factory No. 7, Chicago.

Description As To Covers Used On Our Upholstered Furniture,

Illustrated on following pages to give our customers a better understanding of the materials which we use in upholstering our couches, etc. We give below full information as to what the different covers are, coming under grades B., C., F., H. and O. By referring to the price-list you will find each grade comes under different prices which grades are explained as follows:

B. GRADE. In this grade we offer an elegant selection of figured velours a cloth universally known and is the kind of cover most generally used and comes in various blended colors in red, green, and brown back ground. These come in all-over patterns for tufted work and fancy design center stripes for plain top couches. Our solid color and two toned checked velour also come in this grade in red and green colors only, the two toned having black interspersed with red or green. These also come in all-over or center striped pattern for tufted or plain couches as may be desired. We will also make any of our couches in BOSTON LEATHER at the prices as listed under this grade.

C. GRADE. This grade consists of a better selected assortment of figured and checked velour than is described in B. GRADE, also veronas of a good grade. These are in raised figures and come in red and green colors only, however a choice can be made of solid colors or two tones, (Black with red or green.)

F. GRADE. In this grade we have a fine assortment of high grade veronas in attractive red and green colors but we usually manage to purchase these goods with some black with the red or green which makes it very attractive. Couches wanted in chase leather also come under this grade. In this grade we use only the best grade of genuine chase leather that can be secured and when one of our couches is made up in our special grade of chase leather it has the same expensive appearance as the genuine leather couch.

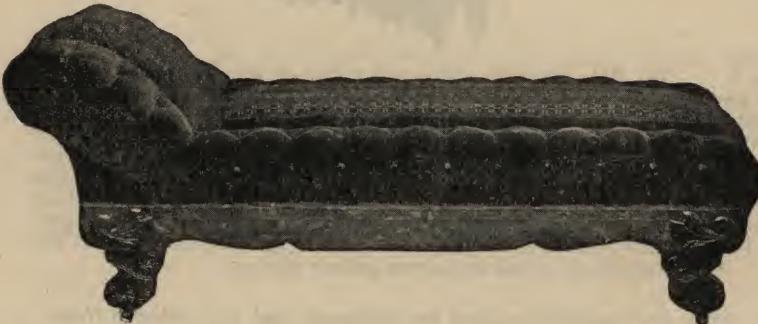

H. GRADE CRUSHED PLUSH. Crushed plush is universally known. It is made in many grades, but the quality which we use is not to be compared to what is offered by many other manufacturers and dealers. The crushed plush which we furnish is made especially for us of a strictly high grade fur which has an exceptionally silky, lustrous appearance and is guaranteed to hold its color; even the finest wool will not compare with it in this respect, after the fur is woven into the cloth the entire piece is put through the process of crushing, which brings out the rich shaded effects for which this cloth is so much sought after. We can furnish crushed plush coverings in red, green, blue or brown, in solid colors only.

O. GRADE CAR PLUSH. Car plush is one of the oldest staple coverings that has ever been produced. It derives its name, car plush, from the fact that it is so extensively used in covering car seats and is especially selected for this purpose on account of its durability. Fabrics that look well but do not wear well, soon go out of style, but a couch covered with car plush is always in style and will look well and wear like leather. There are many grades of car plush, some being made with the pile of the cloth of wool and mohair mixed, others with cashmere and mohair mixed, or in other combinations which cheapen the cost of production. We use only the very best grade of genuine all mohair car plush, which is the only fabric that will hold its color absolutely, and there is no other fabric, even including wool, silk or linen that will hold its color as will mohair. We guarantee it not to fade. We can furnish either in deep red, myrtle green or tobacco brown colors.

UNEXCELLED VALUES IN COUCHES.

Couch No. 5401. This couch has solid oak frame nicely finished in golden oak color. Can also furnish same with frame made of birch and finished in a perfect imitation mahogany. The couch measures 72 inches long and is 27 inches wide. Equipped with an abundance of steel tempered springs. Tow with cotton is used as filling which makes the couch lasting and comfortable.

STOVE DEPARTMENT.

RIVAL AMERICA STEEL RANGE with reservoir and high closet, will burn hard or soft coal or wood. This is an attractive steel range of superior and careful construction. The body is made of Wellsville polished steel; all parts are amply proportioned and made to insure convenience, economy and perfect operation. It has a large broiler door or feed door in front end of range. It is made with heavy centers and covers, large fire box supplied with duplex grate. Bailed ash pan. This range is attractively finished with nickel trimmings which consists of fire door, ash pan door, door frame, knobs, bands, name plate, balance spring, ash guard, nickel towel rod along front of top. The high closet is rich in design and finished with nickel plate teapot stands, draft register in pipe, bands, handle, side brackets, corner brackets, and top back guard. The cast reservoir is flush with top of the range and is provided with a large cast enameled tank and japanned covers. A good range at a low price. This range is made in three different sizes, with and without reservoir, and weighs, made up in the different manners per price lists, from 265 to 350 pounds.

MYSTIC AMERICA STEEL RANGE with reservoir and high closet. Burns hard or soft coal or wood. This Mystic America is an attractive steel range, carefully constructed of Wellsville polished steel. All parts are amply proportioned and made to promote durability, convenience and economy. The oven, fire pot, flues, clean out, end feed, or broiler and front feed are large. It is made with heavy centers and covers, large fire box, supplied with duplex grate. Bailed ash pan. To produce beautiful finish the edges, corner pieces, panels, door frame, knobs and bands are nickel plated and polished. The high closet, in harmony with the body, is rich in design and finish, and with nickel plated teapot stand, pipe section draft register, bands, handle, side brackets and corner brackets. The cast reservoir is flush with top of the range and is provided with large cast enameled tank and japanned covers. This range is made with or without reservoir in several different sizes weighing from 275 to 350 pounds. See price list.

HOME AMERICA square cook stove for either coal or wood. This stove is inexpensive and economical in operation. Large fire box, extra large ash receiver and flues so arranged and proportioned that they carry off the products of combustion easily and at the same time make them circulate over three sides of the oven. The result is an evenly heated oven. Large top, combination feed of ample size, cut long center, heavy covers, sectional fire back, outside oven shelf, back shelf, nickel oven door panels and oven door kicker. The Home America is the best medium priced cook stove in existence regardless of name or where it comes from. Made both with and without reservoir in different sizes weighing from 165 to 290 pounds.

REGAL AIR TIGHT WOOD HEATERS, No. 810. Made of high grade polished steel, 18 inches long, 14 inches wide and 15 inches high. Height from floor to top of urn, 21 inches. Nickel-urn and keys. This stove does not have double corrugated bottom or top draft. Our air tight stoves embody all the good qualities known in air tight construction, together with ornamental features, which make them neat and durable parlor stoves. Body is made of polish steel, mirror finish. Linings are heavy sheet steel made in sections without the use of rivets or bolts.

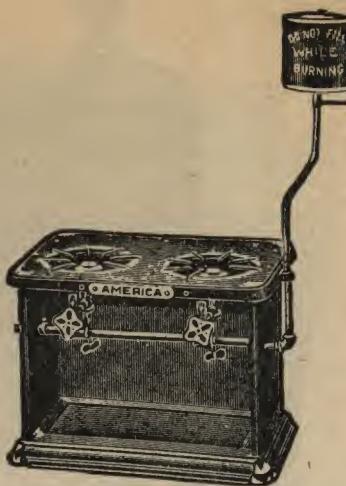

SUN STERLING return flue base heater. Hot air circulator. For hard coal the Sun Sterling is a beautiful return flue parlor heater. It has extra mica illumination extending to the polished nickel reflector top. A very important feature of this heater is the newly-invented shaking grate, resting on an independent sliding grate frame which can be readily drawn out through the ash pit door. Grate frame is cast in one piece, forming an ash tube. The dampers (the check damper serves as a dust damper) are simple and the stove easily operated and controlled. Extra heavy and deep fire pot cast in one piece. The nickel parts, including dome, jacket, side columns, name plate, foot rails, base skirts and legs are all ventilated to prevent tarnishing by heat, and can be readily removed. Elegant ormolu urn. This stove is made in five different sizes weighing from 215 to 385 pounds.

SUN HOT BLAST gas and smoke consumer, for hard or soft coal or wood. The Sun Hot Blast, made full in size and handsome in design, comprises all the practical features of a convenient, durable, effective and economical heating and hot blast stove. A heavy hollow ring encircles the top of the fire pot, through which the air is admitted by means of a screw draft register in front of the stove into the fire pot, where it comes into contact with the gas and smoke caused by combustion and produces blast of the greatest intensity, thus consuming all the gas and smoke. It has ornamental base with heavy sheet steel under base bottom, heavy corrugated fire pot and large ornamental fire pot ring, shaker, draw center grate, cut off grate for wood, large ash pan, nickel hook-on foot rail in three interchangeable sections, nickel plated steel top ring, nickel swing top, name plate, screw registers, knobs and handles, and a handsome top ornament. This stove is made in six different sizes and weighs from 105 to 225 pounds.

Nos. 211, 261 and 232 made in different sizes. See price list. Height from floor to top of urn, 44 inches. Nickel urn, nickel name plate, upper draft and keys. Removable linings and double corrugated bottom. The inner bottom is corrugated, making a solid rest for the fuel and prevents extreme radiation to the floor. Top draft and ornamental cast plate with screw draft. Lower draft consist of an ornamental cast frame and door with a screw draft and spark arrester. No rods are used in these stoves, and all bolts are protected from the fire.

GASOLINE STOVES.

No. 2A. Has stationary tank and individual burners which have $\frac{3}{8}$ -inch iron standpipes, brass angles, cast iron drilled cones, and cleaning needle with brass check nut. The end panels are in one piece and the base has a brace running cross-ways, thus making a strong and durable stove.

No. 3A. Same stove with three burners. Size $14\frac{1}{2} \times 30$ inches, height $14\frac{1}{2}$ inches, weight 28 pounds.

No. 4A. Same style only standing size with 2 burners. Size $14\frac{1}{2} \times 21$ inches, height $24\frac{1}{2}$ inches, weight 28 pounds.

No. 5A. Same as No. 4A, but has three burners; is $14\frac{1}{2} \times 30$ inches and weighs 35 pounds.

We will furnish oven for gasoline stove when desired. The ovens we furnish have mirror finish, planished steel, japanned steel top lined with corrugated tin, full flu-

All our stoves are carefully packed for shipment which is made direct from our factory No. 14 located in Chicago.

No. 113. Has individual brass burners on top and extra large burner under step, top of step is $14\frac{1}{2} \times 16$ inches and stands $16\frac{1}{2}$ inches from the floor. Size of top $14\frac{1}{2} \times 21$ inches. Height 27 inches. Weight 46 pounds.

No. 114. Same stove, only has three top burners and step. Top size $14\frac{1}{2} \times 30$ inches and weighs 56 pounds.

ed, the heat is evenly distributed throughout the oven and has a special feature in the choice of door openings. The numbers and sizes are as follows:

- No. 1. Large $19\frac{1}{2} \times 20 \times 13$ inches with side drop door.
- No. 2. Large $19\frac{1}{2} \times 20 \times 13$ inches with swing drop door.
- No. 3. Large $19\frac{1}{2} \times 20 \times 13$ inches with end swing door.
- No. 4. Large $19\frac{1}{2} \times 20 \times 13$ inches with end drop door.
- No. 5. Small $19\frac{1}{2} \times 13 \times 13$ inches swing door.
- No. 6. Small $19\frac{1}{2} \times 13 \times 13$ inches drop door.

No. 31. Dresser. This dresser is made of thoroughly seasoned and kiln dried material. This dresser is greatly sought for owing to the fact we make it in three different finishes, which are golden oak, white maple, finished natural, or imitation mahogany, which makes it an attractive article to use with iron beds. The base is 22 inches wide and 44 inches long. The mirror is best French bevel pattern plate 24×30 inches in size. Standards and glass frame are rounded and ornamented with genuine hand carving. Shipping weight 140 pounds.

No. 991. Dresser. This dresser, like No. 31, comes in either selected white maple finished natural, solid oak finished golden, or in perfect imitation mahogany finish. The top is 22 inches wide and 44 inches long. The mirror is best quality French bevel pattern plate 24×30 inches in size. The standards and glass frames are nicely ornamented with heavy hand carving, giving this dresser an attractive and expensive appearance. Packed carefully for shipment, shipping weight 140 pounds.

These dressers are shipped direct from factory No. 17 located in Southern Michigan.
